# Be Tru FaceLift<sup>®</sup> Report

Peter T. Pugliese, MD & Associates

7139 Bernville Road, Bernville, PA 19506

(610) 488-1234

Dear Cathy,

When a company approaches me to conduct a clinical study I carefully evaluate the skin care product(s) and/or device to determine what and/or how it works on the skin. The dramatic results produced in such a short time with the Be Tru Face Lift system were exceptional. Fifteen minutes after the first BTFL treatment was performed the study participants showed a positive effect in almost every parameter that we measured. The skin texture was smoother, fine lines and wrinkles appeared less visible, skin color was more uniform, and the facial features were more defined. At 2 weeks the women appeared as if they had a makeover or a mini facelift. Fine lines and wrinkles were markedly reduced, the complexion and skin color was improved, and the jawline, nose and eyes more defined. At 4 weeks their skin exhibited even greater improvements. The skin was smoother and even colored, facial lines and wrinkles were reduced further, facial pores reduced, along with decreased redness (inflammation) and porphyrins (*p.acnes* bacterium). The change in their skin and them was astounding. The women were extremely happy with the results that they saw in the mirror too.

The BTFL skin care products did contain “active ingredients”; however, results of this magnitude in such a short amount of time could not be attributed to the use of these products alone. I have to believe that the spectacular study results were due to the use of the beauty wand and facial manipulations in conjunction with the skin care products. It is a well known biological principle that certain types of physical energy, including facial massage, is capable of effecting tissue restoration. The BTFL system promotes lymphatic drainage which is known to be beneficial to the skin and total body health. My overall impression is that anyone that wants to turn back the hands of time should use the BTFL system as part of their daily routine.

Normally, with use of a highly efficacious material, it would take at least 6 – 8 weeks to see a modest reduction in fine lines and wrinkle due to the restructuring of the dermis. The fact that there was a marked reduction in fine lines and wrinkles, both length and depth, is unusual due to the time factor. That is what makes the BTFL system interesting.

Best regards,

Peter T. Pugliese, MD

(610) 488-1234

The following claims about the BTFL system can be substantiated by the clinical study that we performed:

Reduces pores by 11% at 2 weeks and 8% at 4 weeks.

Texture was improved by 12% after the first treatment, at 13% at 2 weeks and at 19% at 4 weeks. This is a superior finding.

Reduces redness of the skin by 12% at 2 weeks and 8 % at 4 weeks.

Helps reduce redness

Helps reduce inflammation

Helps reduce irritation

Reduces porphyrins by 5% after the first treatment, 8% at week 2, and 11% at week 4.

Helps shrink acne-like lesions

Helps to heal acne by reducing inflammation

Helps to heal acne by reducing porphyrins (*p. acnes*)

Reduces fine lines and wrinkles by 23% after the first treatment, 15% at 2 weeks, and 27% at 4 weeks. This is a superior finding.

Reduces the appearance of aging

Helps prevent signs of aging

# Be Tru FaceLift<sup>®</sup> Report

Reduces “skin stiffness” by 21% at 4 weeks. This is a superior finding.

Increases skin elasticity

Increased resiliency of skin

Skin redness (direct measure of blood vessels and hemoglobin in the papillary dermis) increases by 24% after the first treatment redness. This indicates that the BTFL system stimulates blood circulation to the skin.

Increases circulation

Promotes lymphatic drainage

Reduces excess fluid – the eyes, nose, jawline, and lip area are more defined

Helps remove toxins

Stimulates muscles

Helps rejuvenate the skin

No adverse effects

Safe and effective

# Be Tru FaceLift<sup>®</sup> Report

Results after only 4 weeks Jaw Line, Naso-Labial Fold, Texture and Wrinkles

# Be Tru FaceLift<sup>®</sup> Report

Results after only 4 weeks Chin, Frown Lines, Skin Discoloration

# Be Tru FaceLift<sup>®</sup> Report

After 2 weeks spectacular results:

- Puffy face decreased
- Redness decreased
- Brown spot over eye decreased
- Blemish on eyebrow vanished
- Eye brows lifted
- Eyes more open
- Glabella crease decreased
- 
- Wrinkles under eyes decreased
- Corners of the mouth lifted

134. *Topical Vitamin E - Indications of Vasoconstrictive Activity in Humans from Measurements of Thermal Resistivity of the Skin with Dr. David Salter and Carl Nocka.* Scientific Seminar Society of Cosmetic Chemists, Cincinnati, Ohio, May, 1983.
135. *Transepidermal Water Loss Studies with Vitamin E with Carl Nocka and Vicki Lebo.* Presented at the Scientific Seminar, Society of Cosmetic Chemists, Cincinnati, Ohio, May, 1983.
136. *Immunochemistry: An Introduction for Cosmetic Chemists.* DRUG AND COSMETIC INDUSTRY, February, 1982.
137. *Ellipsometric Measurements of the Refractive Index in Vivo, Bioengineering and the Skin.* MTP Press, R. Marks and P. A. Payne, 1981.
138. *Assessment of Efficiency Testing Procedures, Past - Present - Future.* Presented at the International Symposium of Lanolin and Lanolin Products, Arnold and Marie Schwartz College, December, 1980.
139. *Studies on the Epidermis using Fluorescent Dyes and Cyanoacrylate Stripping.* Society of Cosmetic Chemists, New York, New York, 1981.
140. *Immuno-electrophoretic Studies of Protein Binding of Cosmetic Materials in the Stratum corneum.* Society of Cosmetic Chemist Annual Seminar, Washington, DC, 1981.
141. *Immunological Studies in Cosmetic Efficacy.* Presented at the International Federated Society of Cosmetic Chemists, Venice, Italy, 1980.
142. *A Physician's View of the Emerging Skin Care Market.* COSMETICS AND TOILETRIES, December, 1979.
143. *Internal Reflection Spectroscopy of the Skin.* Presented at the Society of Cosmetic Chemists, December, 1979.
- 144.

# Be Tru FaceLift<sup>®</sup> Report

Continued:

145. *Studies of Skin Refractive Index by Ellipsometry*. Presented at the International Symposium on Bioengineering and the Skin, Cardiff, Wales, 1979.
146. *Ellipsometric Measurements of Skin Refractive Index*. Presented at the Society of Cosmetic Chemists, Dallas, Texas, 1979.
147. *Instrumental Techniques for Evaluation of Skin Care Products*. DRUG AND COSMETIC INDUSTRY, 1979.
148. *The Measurement of Enzyme Kinetics on the Intact Skin - A New Method to Study the Biological Effects of Cosmetics on the Epidermis*. JOURNAL OF THE SOCIETY OF COSMETIC CHEMISTS, 1978.
149. *Studies on Antibodies to Lung Extract in Berylliosis*. ARCHIVES OF INDUSTRIAL MEDICINE, 1967.
